

## **Environmental Protection Policy – Commitment to a Safe and Healthy Environment**

- Separation and reduction of generated waste, recycling.
- Use of modern technologies, machinery, and equipment that enable energy efficiency.
- We support environmental improvements, comply with applicable legislation, and meet the expectations of customers, neighbours, and the public.
- We ensure the efficient use of water, energy sources, raw materials, and other resources.
- Using the best available means and other measures to prevent or reduce environmental impacts throughout the entire lifecycle of products.
- Technological renewal of processes to minimize the consumption of natural resources and reduce waste generation.
- Where possible, we replace hazardous substances with less hazardous ones in technologies.
- Reducing the risk of emergency events and improving procedures for responding to such situations.
- Regular monitoring of environmental impacts.
- Raising employee awareness about environmental protection through education and training.
- Informing employees and other stakeholders about the status and achievements in environmental management.
- Strictly ensuring compliance with legal and other requirements we have agreed to.
- Influencing responsible environmental behaviour among contractual partners, where possible.
- Setting, monitoring, and controlling environmental goals and programs.
- Sustainable business practices and circular economy.
